EDUCATION

Institut Spécialisé de Technologie Appliquée (ISTA), Morocco , Driouch   **Aug 2022 - June 2024**
   Full Stack Web Development

- Technical Skills Acquired: Advanced proficiency in web development technologies, including JavaScript, TypeScript, React.js, PHP, Laravel, SQL, and modern UI/UX design tools such as Figma and Adobe XD. Experience with full-stack development, database management, and web hosting solutions.
- Soft Skills Developed: Enhanced problem-solving abilities, effective communication, teamwork, and project management. Trained in Agile methodologies and adept at adapting to new technologies and managing multiple projects efficiently.

PROJECT WORK

Moulay Ismail High School Project (Video available in portfolio)   **April 2024 – May 2024**

School Management System
Technologies: Laravel, Bootstrap CSS, custom CSS, APIs for books
Main Features:

- Public Website:
  - Introduction to the institution
  - News section displaying the latest updates
  - Student section showing study schedules and dates
  - Enables students to request a school certificate by entering their information, allowing them to check if the certificate is ready for pickup at the school
- Control Panel 1 (for administration):
  - Upload new news, study times, and institution details (phone numbers, address)
  - Manage school certificate requests: Students submit requests via the website, and the administration processes these requests
- Control Panel 2 (for administration):
  - Track student attendance: View which students have been absent in real-time
  - Manage professors, departments, and subjects: Add professors and link them to the subjects they teach and the departments they belong to
- Control Panel for Professors:
  - Professors log in with their credentials (email and password)
  - Choose their teaching section and record student absences, which are immediately visible to the administration
